

Riga Technical University in cooperation with JLU Technologies Ltd organized of International conference “The International Conference on Bionics and Prosthetic, Biomechanics and Mechanics, Mechatronics and Robotics”(„VARNA”) invites to participate in the extraordinary visiting international conference in Riga from 17 to 21 June 2013.

The scientific program of conference will consist of following sections:

1. Bionics and Prosthetics
2. Biomaterials symposium
3. Biomedical engineering symposium
4. Biomechanics and Mechanics section.
 - 4.1. MET – Material Environment Technologies symposium
5. Mechatronics and Robotics section.
 - 5.1. Biomechatronics and robotic rehabilitation symposium
6. Keynote lectures.

The purpose of the conference is to strengthen contacts between Bionics, Prosthetics and Orthotics Clinician, Biomechanics, Mechanics and Robotics researchers, and to bring together professionals from all over the world to discuss actual problems in Bionics and Prosthetics, Mechanics, Biomechanics and Biomaterials, Robotics.

Conference proceedings will be published in Book of Proceeding of the “Baltic - Bulgarian Conference on Bionics and Prosthetics, Biomechanics and Mechanics, Mechatronics and Robotics” as well as in electronic form with its own DOI and ISSN.

Financial support for conference organization is provided by ERAF Project „Development of Riga Technical University International Cooperation, Projects and Capacity” (Nr. 2010/0190/2DP/2.1.1.2.0/10APIA/VIAA/003; PVS ID 1506).
