Sweden, 2013, November 27-28

Over 70 inventions and innovations were displayed at the 4th Bi-Annual International EUROPEAN WOMEN INVENTORS & INNOVATORS NETWORK INTERNATIONAL EXHIBITION, CONFERENCE & AWARDS. An impressive range of Inventions from a vast amount of sectors were displayed which include from specialized products in healthcare from Sweden that help lower radiation dose, make examinations safer with good quality results, the "Cablebug" from the United Kingdom - a moulded plastic box, which opens in half and is placed around a cable and then snapped shut suitable for labelling leads, Estonia's innovative and unique 3D textile inspired by nature, and the Japanese shibori technique and a class of medicinal pharmaceutical products for the assessment of treatment efficacy for patients with neuroendocrine tumours from Poland and many more fascinating concepts and products.

The event shall bring relevant and high profile dialogue on possible opportunities across the international world, Europe and in particular Sweden. More than 100 innovative and influential business owners and professionals at the conference and Awards ceremony where main theme this year is Accelerating Growth in Product & Service Innovation in Europe and beyond. The focus of this event is to promote the Social and Economic Empowerment of Women in relation to fast-tracking of skills development, knowledge transfer, intellectual property rights, access to finance, product development, manufacturing, equity and commercialization, international trade and all aspects covering the successful exploitation of viable innovative ideas.
